The vast majority of Sterile Processing professionals around the country do not or can not, attend large annual conferences each year. So, there are a many of us who never get a chance to hear from the diverse vendors out there who are innovating products and services to make our jobs better.

This SPX2022 expo is for the rest of us - the 99% of us who need to see and hear this product and service information because it impacts our daily lives in our departments. Our team at Beyond Clean is working to fill this gap and provide an opportunity for EVERYONE to engage with vendors in a FREE, open, and creative format.

As an industry, we're all working together to build a safer Sterile Processing environment, but that requires learning & knowing about the better tools and equipment out there that can take our departments **#BeyondClean**.

We are excited to help that happen this year at SPX2022! See you online!
